Safety and Monitor boat locations

Suitable Set down points for rescued people

- | | |
|--------|------------------------------|
| Boat 1 | Start Area |
| Boat 2 | End of house boats |
| Boat 3 | York Motor Yacht Club |
| Boat 4 | Millennium Bridge area |
| Boat 5 | Inside of the R Foss bend |
| Boat 6 | Just above the finish / City |
| screen | |

Remember the Club is the best set down point - but keep any rescued people warm

COMPETITORS RESPONSIBILITY - You must observe the Rules & Instructions at all times. YOUR SAFETY IS OUR CONCERN

River Ouse Emergency Points

“Where are the signs?”

In all there are 20 signs:

9 Forward Control Points (FCPs), which are numbered F1 to F9 and 11 Emergency Meeting Points (EMPs) numbered Em1 to Em11.

The difference is important for the emergency services as it identifies potential for a different level of response.

As far as river users are concerned however, as long as they remember to take note of both the letters and the numbers on the signs, the difference is academic.

Please Note: except in an emergency, the majority of the locations are not mooring points; please use common sense, and respect the landowners who have agreed to host these signs for the good of all river users and do not moor at these points.
